Holmbergs®
DigitalSafety™

Connected base

A Holmbergs DigitalSafety™ child car seat installation guide

The world's first fully integrated digital safety solution for child car seats. A complete solution, developed for a digital world. Containing the Connectivity Hub™ and the white-label app, the Holmbergs DigitalSafety™ solution makes you a truly next level safety provider for your customers. Connect Isofix connectors or arms, support leg and seat/base connection to the Connectivity Hub™. The hub receives information from the connected sensors in the base and your customers will receive interactive installation support in the app.

Step 1
Connect Isofix

Once both isofix connectors are correctly connected the istallation guide will pass you on to next step

Step 2
Extend support leg

Once the support leg is correctly extended the installation guide will pass you on to next step
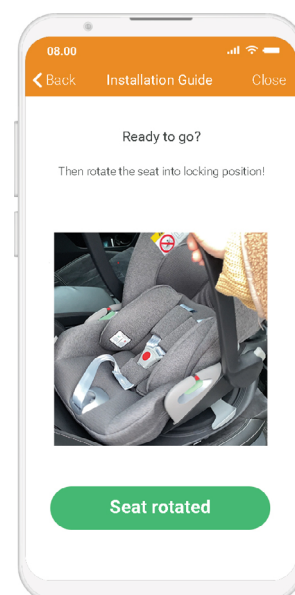

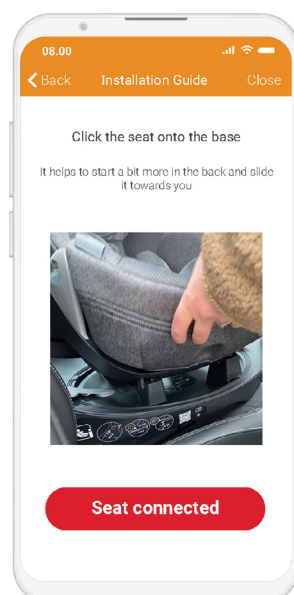

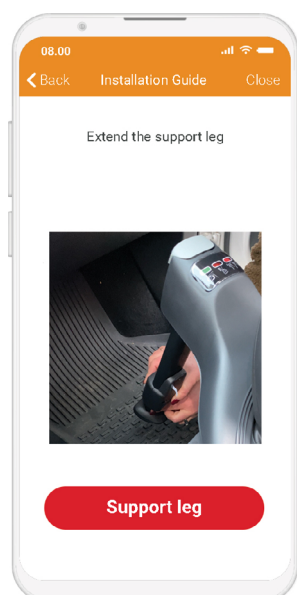

Step 3
Click seat onto base

Once you clicked the seat correctly onto the base the installation guide will pass you on to next step

Step 4
Rotate seat

Once you rotated the seat into driving position the installation guide tells you that you installed the seat correctly and you are ready to go!

Safety that never stops

Holmbergs® DigitalSafety™
